One Step Secure IT Signs On as 2026 Cybersecurity Awareness Month Champion

PHOENIX, AZ | PR WEB | OCTOBER 1, 2026

One Step Secure IT has been recognized as a Champion of Cybersecurity Awareness Month 2026, reinforcing its commitment to helping organizations protect critical infrastructure and build cyber resilience as America enters its next era.

This marks the fourth consecutive year One Step Secure IT has participated in the Champions Program, which brings together businesses, government agencies, educational institutions, and nonprofits to advance cybersecurity awareness nationwide.

"As we celebrate America's 250th anniversary, 'Securing the Next 250' reminds us that cybersecurity is foundational to our nation's future," said Scott Kreisberg, Founder and CEO of One Step Secure IT.

"By combining AI-driven security tools with disciplined practices and a culture of awareness, organizations strengthen not just their own resilience, but America's. We're committed to helping our clients turn security awareness into measurable, lasting protection."

2026 Theme: Securing the Next 250

This year's Cybersecurity Awareness Month emphasizes building a secure digital future for America's next era. CISA and the National Cybersecurity Alliance are highlighting essential actions that organizations should implement now:

- Teach employees to avoid phishing scams. Build human awareness as your first line of defense against social engineering attacks.
- Require strong passwords and multifactor authentication (MFA). Eliminate weak credentials and add critical verification layers.
- Update software promptly. Install patches immediately to close vulnerabilities before exploitation.
- Back up and encrypt data. Protect critical information with redundancy and encryption protocols.
- Establish incident response plans. Prepare your organization to respond quickly and effectively to cyber incidents.

Why This Matters Now

As cyber threats grow increasingly sophisticated, organizations of all sizes face escalating risks to their data, operations, and reputation. A proactive security strategy, combining technology, processes, and people, is no longer optional. One Step Secure IT brings over four decades of expertise helping organizations build comprehensive, resilient security strategies tailored to their unique risk profiles.

About the Champions Program

Cybersecurity Awareness Month, co-led by the National Cybersecurity Alliance and CISA (U.S. Department of Homeland Security), has been a Presidential initiative since 2004. The Champions Program unites public and private sector leaders in a coordinated effort to strengthen the nation's cyber resilience and critical infrastructure.
